

ProjexOne™ CyberSecurity and IT Management Platform

A modern, tiered defense for today's AI-driven threats

Cyber attacks have shifted from breaking into networks to targeting people, identities and cloud applications. Criminals now use AI-powered phishing and stolen credentials to impersonate employees, access Microsoft 365 and compromise SaaS systems — attacks traditional antivirus and firewalls cannot stop.

ProjexOne™ Tier 1: Essential Endpoint Management and Protection

Tier 1 secures devices with managed patching, endpoint protection, user training, access controls, incident response planning and backup strategy — addressing the most common causes of breaches and downtime.

ProjexOne™ Tier 2: Essential SaaS and Identity Protection

Today's biggest risks live in the cloud. Tier 2 protects Microsoft 365, e-mail and user identities using AI-driven phishing defense, identity monitoring, SaaS risk controls and configuration backup. It prevents account takeover and business e-mail compromise — the most financially damaging attacks facing SMBs.

ProjexOne™ Tier 3: Optional Advanced Protections

Tier 3 adds network monitoring, mobile device management, business continuity tools and advanced identity controls. These enhanced layers support compliance, reduce operational risk and strengthen overall security posture.

Together, the three tiers of ProjexOne™ deliver a complete, modern cybersecurity defense. They protect your people, your devices, your cloud systems and your data — so your business can operate with confidence in today's AI-driven threat landscape.

ProjexOne™ Tech Stack/CyberSecurity Checklist

Projex IMC provides IT/CyberSecurity services to over 200 manufacturing, distribution, and local government/police departments (our technicians are CJIS certified) in Western Pennsylvania. We have over 30 years of experience designing, building, protecting, monitoring and maintaining IT systems.

Essential Endpoint Management and Protection - Tier 1	ProjexOne™	Current Protection
Remote management, continuous monitoring and alerts (RMM)	✓	<input type="checkbox"/>
Automated patch management, policies, performance monitoring	✓	<input type="checkbox"/>
Antivirus and malware protection (AV/AM)	✓	<input type="checkbox"/>
Ransomware detection	✓	<input type="checkbox"/>
Endpoint detection and response (EDR)	✓	<input type="checkbox"/>
Managed detection and response (MDR)	✓	<input type="checkbox"/>
Activate/configure MS Exchange e-mail filter	✓	<input type="checkbox"/>
DNS/web search protection	✓	<input type="checkbox"/>
Integrated asset management and user documentation	✓	<input type="checkbox"/>
Endpoint/server full image and/or bare metal backup (25GB base)*	✓	<input type="checkbox"/>
Access control/MFA plan	✓	<input type="checkbox"/>
Backup and disaster recovery plan (BDC/BCDR)	✓	<input type="checkbox"/>
Incident response plan (IRP)	✓	<input type="checkbox"/>
Online security awareness training (SAT)	✓	<input type="checkbox"/>
Essential SaaS and Identity Protection - Tier 2	ProjexOne™	Current Protection
Cloud detection and response (CDR)/SaaS alerts	✓	<input type="checkbox"/>
Microsoft Entra ID backup	✓	<input type="checkbox"/>
SaaS backup and recovery (60GB per user base)*	✓	<input type="checkbox"/>
